

CHÂTEAU MAZEYRES 2023

Consultant Alain Moueix

Vineyard Manager Jean-Michel Bernard

Cellar Master Thomas Cézac

Communication Lisa Marois

Director Of Business operations Stéphanie Rosa

Weather Conditions

Vigilance rewarded

The slightly warmer winter than normal was colder only in February. The precipitation was normal. Only the months of November and March were in surplus. Mid-budburst occurred around March 30 and the frost on April 5 caused limited and very localized damage. Flowering was observed around May 30. But the phenological stages between the plots were quite heterogeneous.

From June, the heat set in and numerous storms broke out, favoring very significant mildew pressure. The vigilance of our team and our affirmed practice of biodynamics allowed us to preserve our crop.

From July, dry and hot conditions set in for a long time. The particularly slow veraison did not make it possible to eliminate the heterogeneity of development between the plots.

The harvest started under bright sunshine on September 5th and we then decided to harvest « à la carte » to wait for perfect maturity in each plot. The first juices had impressive balances: phenolic richness and beautiful acidity combined, with a strong identity of each vat that had to be « tamed ». This very good vintage, whose quality will have been given by the Indian summer, allowed us to pick magnificent grapes with satisfying volumes

Surface area	23.92 hectares
Terroir	gravels and sandy clay
Grape varieties	86 % Merlot - 10% Cabernet Franc - 4 % Petit Verdot
Harvest dates	05th to 29th of september
Vineyard management	Organic and biodynamic wine Certified by FR-BIO-01 Agriculture France Contrôlé Biodyvin by Ecocert France SA
Ageing	37 % en barrels w including 23% of new oak and 5% of 600 liters, 11 % concrete egg-shaped vats of 7 hl, 16% in foudres, 8 % in amphoras et 23% in tank
Yields	35 hectoliters/ha
Production	74 900 bottles
